We are moving forward with our 2022 season!

We are pleased to confirm that despite the earlier withdrawals of January and February 2022 conferences, we are moving forward with conferences scheduled in the month of March in California and Italy.

If your conference community was affected by the withdrawals in January and February of 2022, please check the program page for up to date information on when these conferences will be held. The majority have been rescheduled for the fall and summer of this year, based on the input of the conference chairs and venue availability.

Thank you for your continued support of Gordon Research Conferences and we look forward to a successful 2022 season!
Vaccination Policy and COVID-19 Protocols

GRC is requiring proof of a COVID-19 vaccination and booster shot (if eligible) from all registered attendees, speakers and guests.*

GRC will accept proof of the following types of vaccinations listed below:

- AstraZeneca/Oxford
- Johnson & Johnson
- Pfizer/BioNTech
  - Moderna
  - Sinopharm
  - Sinovac
  - Covishield
  - Covaxin
  - Novavax
  - Covovax

You are considered fully vaccinated against COVID-19 at least 14 days after your second dose of the Pfizer-BioNTech or Moderna COVID-19 vaccine (or other COVID-19 vaccinations recognized by the WHO) or at least 14 days after your single dose of the Johnson & Johnson’s vaccine.

Masks are required in all conference spaces, except when eating or drinking.

GRC will provide reusable masks to attendees and guests upon check-in, and recommends the use of KN95 or N95 masks while attending a conference.

Dining options include eating in the dining room, outside (weather permitting), or taking meals to guest rooms using containers provided by the venue.

Poster sessions will be spaced out as much as possible and may flow into multiple rooms. There will be rotating viewing times for posters based on the number of participants and posters presented.

Please review our venue information pages for information on testing near the conference venue, and travel with rapid tests if possible.

Unfortunately, GRC is unable to provide on-site testing.

*Except in cases where exemptions based on medical or religious grounds are determined to be appropriate by GRC’s Executive Committee. In cases of granted exemptions, GRC’s Executive Committee requires proof of a negative PCR test within 48 hours prior to arrival, proof of a negative rapid test upon arrival, and proof of a negative rapid test prior to departure. If a child will be accompanying you to the conference as a guest and is under the age of 12, proof of a negative COVID-19 test will be required in lieu of a vaccination record for those 2 years of age or older.
